Henry Allen

Founding Engineer @Helmguard | Eurotech Fellow
London, England, United Kingdom

Summary

My Story
At 18, while studying computing in college, I launched my first
business which helps SMB's grow through Facebook ads. That
early dive into entrepreneurship ignited a passion for building
and problem-solving, which led me to combine my love for AI and
business. At 19, I left home for Asia, where I developed custom
AI solutions for businesses and connected with like-minded
entrepreneurs worldwide.

Eventually, I decided to put my self-taught skills to the test in a
structured, high-impact environment. I've taken on a role as an AI
Solutions Engineer in London, where I now thrive in the fast-paced
world of AI-driven innovation.

What drives me?
I'm obsessed with solving complex problems—if you dig deep
enough, there's always a solution. My journey, from being labeled a
"misbehaving ADHD child" to exceeding expectations, taught me one
invaluable lesson: mindset beats circumstance & persistence beats
perfection.

Lifelong learning & adaptability are at the core of who I am. Whether
building AI-driven marketing tools or tackling real-world challenges,
I believe in pushing boundaries, taking risks, and embracing the
unknown.

Let's connect and talk about AI, problem-solving, and the future of
technology!

Experience

HelmGuard AI
Founding Engineer
July 2025 - Present (1 month)

London Area, United Kingdom
